

Electrical Technician – Shovel And Drill at Newmont Mining Corporation

[Apply Now](#)

Company: Newmont Mining Corporation

Location: Ghana

Category: other-general

Newmont Mining Corporation is a leading global gold producer with key assets in Nevada, Peru, Australia, Ghana and Suriname. Newmont's Africa Operations holds two gold mining operations in Ghana: the Ahafo Mine located in the Brong-Ahafo region and the Akyem Mine located in the Eastern region. There is also near mine exploration and development focus in Ghana to annually replace gold reserves. Newmont Africa also has early-stage exploration programs in the African countries of Ethiopia and Africa operations employ approximately 5, employees and contractors, with the majority working at the Ahafo Mine. We offer an unparalleled blend of opportunity and career satisfaction with all the benefits you would expect from a global company. This, combined with our growth opportunities, makes Newmont a great company to Akyem and Ahafo mines have made significant sustainable community development investments in our host communities. These include establishing Development Funds at our Akyem and Ahafo operational areas with each mine contributing US\$1 per ounce of gold sold and 1% of net pre-tax annual profit into its community development only gold company listed in the S&P index, Newmont in 7 became the first gold company selected to be part of the Dow Jones Sustainability World Index. Newmont's industry leading performance is reflected through our Africa operations' high standards in environmental management, health and safety for our workforce and creating value and opportunity for our employees, host communities and Newmont's shareholders.

About This Role To conduct electrical maintenance, deployment, troubleshooting, replacement, repair, and testing of electrical equipment and systems on drills, shovels and support equipment, according to electrical codes, OEM specifications and safety standards to ensure equipment

availability and optimal mining operations and production. **In This Role You Will**

Maintenance

Perform preventive maintenance routines and inspections.

Generate a work order before the remedial or repair work is carried out.

Raise a job card for work to be carried out, if any problems are identified.

Attend to items on the maintenance planning schedule, as and when required.

Accomplish work objectives by determining own work schedule, coordinate with support services

Troubleshoot technical and / or operational problems.

Perform installations, maintenance and repair activities, in accordance with OEM specifications.

Perform routine maintenance on all electrical equipment and ensure effective functioning, including but not limited to maintenance of drills, shovel and support equipment.

Perform a variety of other maintenance tasks, such as electrical preventive maintenance.

Confirm that tag-outs / lock-outs are in place when disconnecting / connecting and removing electrical components.

Attend to equipment breakdowns.

Provides information with regards to maintaining sufficient spare availability and stock levels.

Assist specialists in making more complex repairs

Work within established procedures and operating manuals, as set out by the OEMs and best practice.

Check that daily and rotational quality targets are achieved, including First Stop After PM (FSAPM), Mean Time Between Failure (MTBF) and Mean Time to Repairs (MTTR)

Troubleshooting

Carry out daily inspections and record all findings.

Check all malfunctioned electrical systems and conduct root cause analysis in order to diagnose whether to repair or replace.

Analyze specified problems and issues to find the best technical solutions within OEM specifications and in accordance with local codes.

Strive to reduce downtime and minimize costs.

Reporting

Maintain records of maintenance and repair work.

Produce daily reports indicating the jobs for the day and submit the report to the Supervisor.

Health, Safety and Environment

Deliver own prescribed outcomes and / or provide support services, by applying Newmont's Health, Safety and Environment systems, policies and protocols.

Inspect the equipment to check and identify any electrical and basic mechanical risks

Attend all safety meetings

Working Conditions

The physical demands and work environment characteristics described here are representatives of those that must be met by an employee to perform essential functions of this job successfully. Specific vision abilities required by the job include close vision, distance vision, color vision, peripheral vision, and the ability to adjust focus. Physical Demands: While performing the duties of the job, the employee is required to work in confined spaces and will be exposed to extreme vibration. Work Environment: The employee is frequently exposed to noise of more than decibels, high-temperature, sharp edges, dust, pinch-points, vibration, slippery surfaces etc. The incumbent will occasionally lift heavy materials and/or operate heavy machinery. Personal Protective Equipment (PPE): Work requires mandatory PPE such as a helmet, goggles, highly visible clothing, safety harness, ear plugs and dust mask according to working conditions.

Your Training, Skills & Experience Checklist Formal Qualification (including Professional Registrations):

Electrical Engineering Technician certificate.

Electrical Trade training, apprenticeship.

MINCOM certified as Inspection Engineer as an advantage

Additional Knowledge

Advanced knowledge of mechanical maintenance principles and industry standards.

Advanced knowledge and experience of maintaining Drills. Shovels and support equipment.

Knowledge of the work management process.

Knowledge of planning and scheduling.

Knowledge of CMMS/ERP

Experience

Minimum of 3 years' electrical maintenance experience in mining equipment maintenance, preferably repairing and maintaining drills, shovels and support equipment.

Technical Skills
